

Quick start guide: Meat type

Meat summary information

Registration type

Selecting a **Meat** sample registration type allows you to select the **Meat programme** and **Sample template**.

Dependant fields

Some fields require other specific required fields to be completed first before they can be completed.

A message will be displayed detailing which other fields need to be completed first.

Product details

On selecting a **Meat product sampled** option, additional product details and the **Sampling information** section will now display.

Meat samples and test

Product types

When selecting a **Meat type** registration, the **Type of product to use** select box list will be filtered depending on which species was selected on the **Product details** section of the **Summary information** step.

Additional sample details

The fields displayed under the **Additional sample details** section will depend on which sample template was selected on the **Summary information** step.
